

WHAT'S IN YOUR BOX?

StandardWhatsInYourBox.com

The Factory-assembled, Drop-in Replacement

Standard® Oil Filter Housing Assemblies include the vehicle-specific Filter, Cap, Bypass Valve, Heat Exchanger (Cooler), Gaskets, Hardware, and both the Oil Temperature and Oil Pressure Sensors. Competitor units don't include all of the necessary components.

**What's inside the Standard® box...
a factory-assembled drop-in unit
with sensors and OE-matching filter.
What's in your box?**

Vehicle manufacturers have designed these housings to meet the cooling requirements of today's engines. Standard's Oil Filter Housings are made from a high-strength, glass-filled nylon housing to match the heat-dissipating characteristics of the OE design and keep the oil cool.

A complete, drop-in replacement with everything included for a complete repair

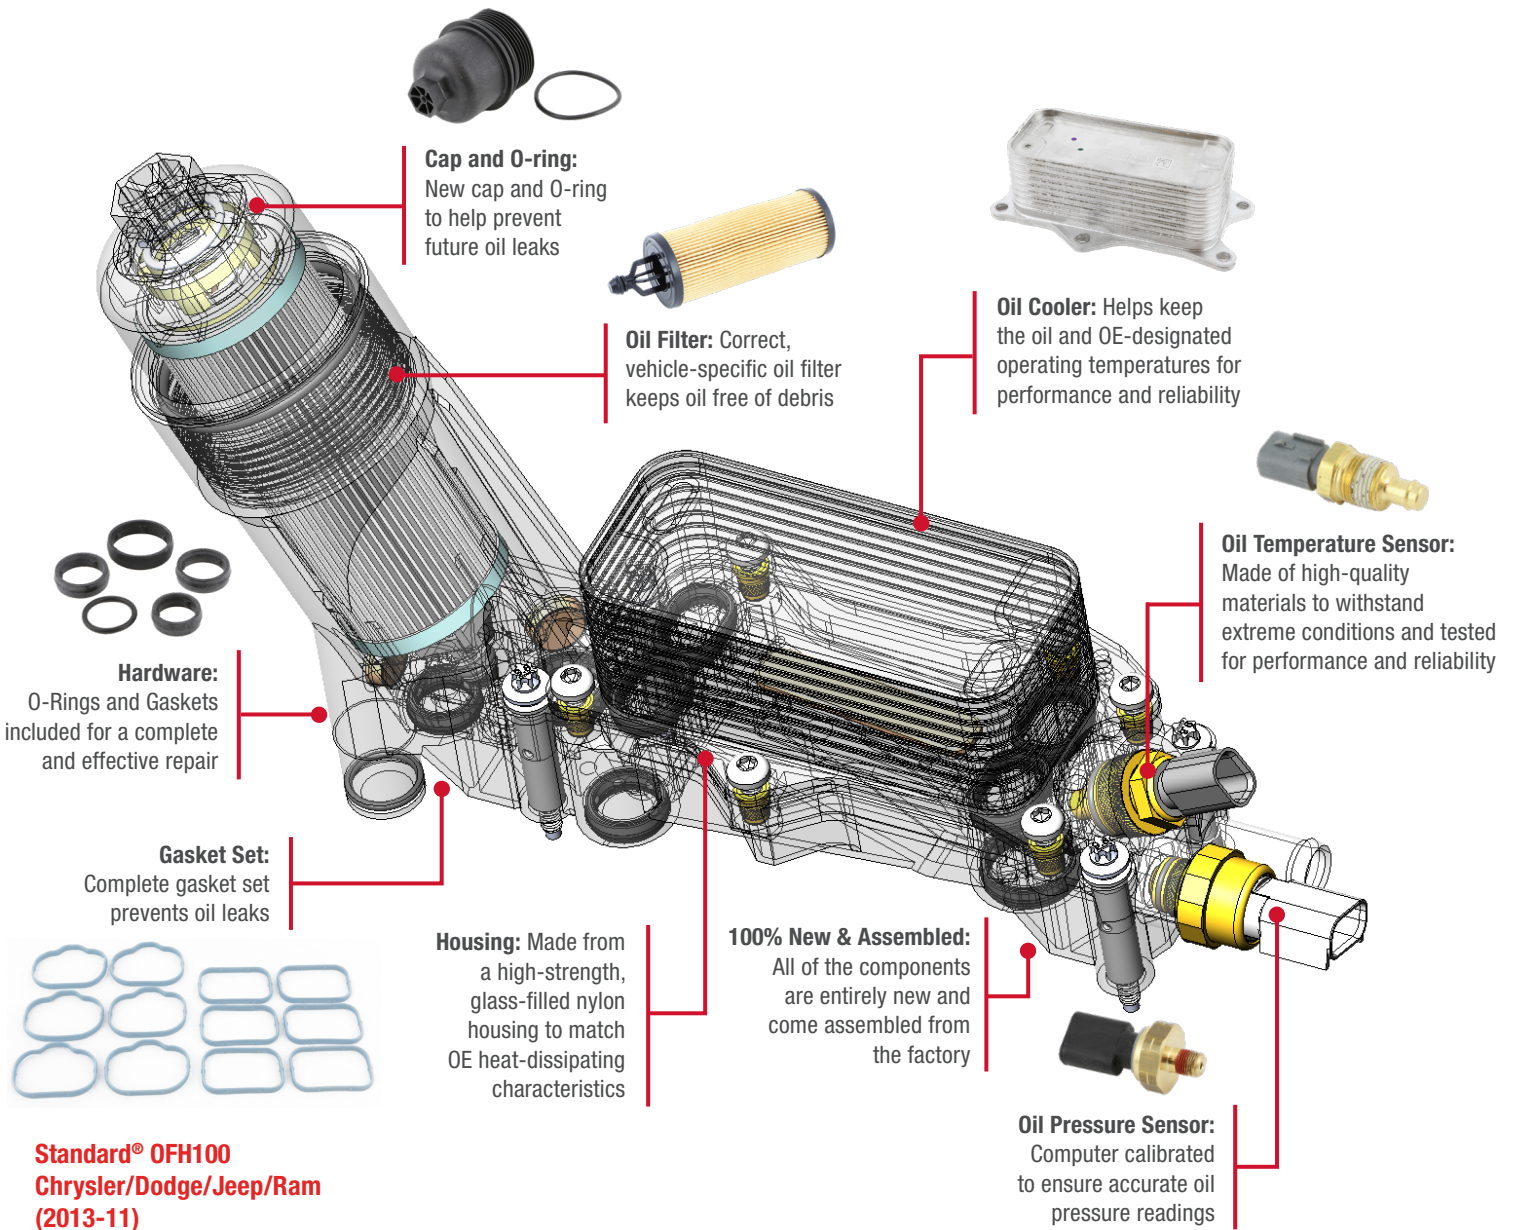

Made from a high-strength, glass-filled nylon housing to maintain matching heat-dissipating characteristics

Assembled with the correct, vehicle-specific oil filter

Factory-assembled, complete drop-in solution that includes everything needed for a complete repair.

The Standard® OFH100 comes completely assembled, so all you have to do is drop it in place. And all Standard® Oil Filter Housing Assemblies include new oil temperature and oil pressure sensors. The oil filter and cap are exact OE-match and come already installed. The Standard® assembly includes all new gaskets and hardware for a clean install – you won't have to reuse any of the old, worn pieces.

For more than 100 years, when the OE failed, technicians have trusted Standard® and Blue Streak® to deliver a part that's equal to or better than the original it's replacing.
